Counterintelligence

The ABW protects Poland from the activities of foreign intelligence services and organisations that may act to the detriment of our country. Counter-intelligence is one of the cornerstones of our work.

Our service monitors, identifies and counters attempts at espionage, subversion and unlawful influence on political, economic and social decisions. Our activities serve to protect sensitive information, state institutions and key sectors of our economy.

Why is this important?

Counter-intelligence enables the state to function in a sovereign and secure manner. Citizens can be confident that strategic decisions are free from external interference.
